Mr. John O'Sullivan  
QuakeKoso Canada Inc.  
Suite 333 / 186 - 8120 No. 2 Road  
Richmond, BC V7C 5J8

Dear Mr. O'Sullivan:

Re: Seismic Gas Valve Shut-Off Installation

The installation of your QuakeKoso seismic gas shut-off valves at housing developments in Richmond, Burnaby, and Victoria was carried out without a problem and the 87 valves have now been in use for about two years. We are happy to say that no problems have been encountered.

We were very satisfied with the entire process and the professionalism that your company showed in the supply, installation and inspection of this project. Service was complete and efficient.

We reviewed a number of related products when considering QuakeKoso's valves and chose this product because of its straight-forward design, limited need for maintenance, and cost effectiveness.

BC Housing is looking forward to doing business with you in the future, as opportunities arise.

Sincerely,

Pete Learoyd  
Manager, Safety and Security
