

Press Release, February 1. 2018

Canadian Distributors.

UL(C) Canadian Marking.

We are pleased to announce the UL listing addition of the 'C' marking to our complete line of Seismic Actuated Automatic Gas Shutoff Valves. (SGSVs)

We sponsored the establishment of the original Canadian Standard (CGA CR-0092) when we founded the Canadian S.G.S.V. industry in 1989: under our predecessor company, Westcoast Seismic Protection Co. Ltd.

Today our Koso California seismic valves are protecting education, health, residential, commercial and industrial facilities across Canada: from '*fire-following*' a major earthquake, on British Columbia's west coast to our eastern seaboard.

Please contact us or visit our website www.quakekoso.com for further Koso seismic products' information.

QuakeKoso Canada Inc. 604 274 5550

KOSO/Calif. Seismic Gas Valves Factory-Authorised Canadian Distributor since 1989.
